

# FRIENDLY FLAGGER

The Friendly Flagger from TCT is a conceptual design featuring TCT's unique sign bases. The Friendly Flagger is designed for construction workers to use on-site to control the flow of traffic. With the Friendly Flagger, worker's comfort is top priority. The design accommodates most 18" and 24" signs. The PVC staff has predrilled holes and cut-out for easy sign assembly. The staff is then simply dropped inside a PVC sheath, from which it swivels.

The Friendly Flagger is designed to fit various TCT sign bases, made of recycled tire rubber. These bases come in a wheeled or non-wheeled version, as well as various weights to fit your needs.

In addition, the flagger staff features yellow reflective striping that is easily spotted by passing motorists.
