

## FLEXIBLE POST :: FP-80

Delineators are designed to direct traffic into a specific lane, or prevent drivers from entering certain areas. The delineators are ideal for use in construction areas or any place where traffic needs to be directed elsewhere. The delineators are made of flexible, molded rubber, so if a vehicle were to hit it then minimal damage would be done. The delineators are available in a variety of styles and feature reflective safety stripes so that drivers are aware of them during the night or while driving in poor conditions. By using molded rubber, the delineators are able to withstand extreme temperatures without cracking or breaking down.

### FEATURES

- Made of flexible, molded rubber
- Features reflective stripes to ensure driver awareness at night or in poor conditions
- Ideal for outdoor use
- Able to withstand the elements without cracking or breaking down
