

3 1/2" HOSE RAMP :: BHR-2

TCT's hose ramps protect pipes and hoses during any construction, municipal, or water-line work. Perfect for temporary or permanent projects, our ramps are easily placed, relocated, and removed to make your project run smoothly and safely. Using hose ramps eliminates the need to place down unnecessary gravel or asphalt, reducing project costs and timelines. TCT's hose ramps are made of recycled tire rubber and will not dry out, crack, or fall apart from road salt or other weather conditions. The hose ramps can easily be installed in areas of high traffic, knowing they will not disrupt the normal flow of traffic.

FEATURES

- Made of recycled tire rubber
- Ideal for indoor or outdoor use
- Able to withstand extreme temperatures without cracking or drying out
- Easy to move and maintain
- Rebar pins on each side for tying units together with hose running inbetween. This prevents ramps from seperating.
- Diamond pattern grip molded into unit to prevent vehicle slippage.

SPECIFICATIONS

- Hose ramp with smooth finish, goes on either side of pipe
- Two units make up a set
- Weight: 48 lbs
- Height: 3 1/2"
- Length: 17 3/4"
- Width: 35 3/4"

ADDITIONAL PRODUCTS

- Additional hose ramps: BHR-1, BHR-3
