

CABLE PROTECTORS :: CORNERS

TCT's line of cable protectors are the perfect solution for temporary events as well as permanent work sites. The corner cable protectors can be used in conjunction with both the standard duty and heavy duty cable protectors. The corner protectors are ideal for cables or wires that need to wrap around corners or that otherwise cannot continue in a straight path. They feature safety warning labels molded into the lid, so you don't have to worry about a sticker falling off. Available in 2, 3, and 5 channel versions, TCT's cable protectors are ideal for protecting any cables or wires that need to be strung across active traffic.
