

GALVANIZED SPIKE :: FS-3

Many of the rubber products TCT provides require some form of hardware for mounting. TCT's various fastener systems provide the correct tools for mounting and using your new TCT products. Each fastener system is designed for mounting products to a different surface, making sure you have the best option to fit your needs. All of the fastener systems are rust resistant and easy to install, so you'll quickly be able to start using your TCT products and not spend time installing. Additionally, the fastener systems are also easily removed, so that the products can be easily removed. Not sure which fastener system is best for your applications? Contact our Sales Manager for more information.
