Cable Protectors – Drop Over

DH-CP-4

TCT's line of cable protectors are the perfect solution for temporary events as well as permanent work sites. The drop-over cable protectors are available in two models, the DH-CP-3 and the DH-CP-4. The DH-CP-3 is perfect for the office, preventing smaller wires and cords from getting caught up in chairs or walkways. The DH-CP-4 can also be used in office settings, as well as in industrial areas. The larger channel underneath makes it ideal for larger cables or wires that could get damaged or cause injury. Both of the drop-over cable protectors are made from durable, molded plastic that will hold up to daily wear and tear.

Features

Features electrical insulation properties
Textured surface to prevent slipping while going over the protector
Tabs on the end allow for multiple cable protectors to be connected together
