DB-27 Delineator Base

DB-27

Delineators are designed to move traffic into a specific lane or to prevent vehicles from entering a certain area. The delineators are ideal for use in construction areas or any place where traffic needs to be directed. The delineators are made of flexible, molded rubber, so if a vehicle were to hit it, there would be minimal damage done. The delineators are available in a variety of colors and feature reflective safety stripes, so that drivers are aware of them during the night or in poor driving conditions. Using molded rubber for the delineators means they will withstand the elements without breaking down or cracking.

Features

Made of flexible, molded rubber
Ideal for outdoor use
Able to withstand the elements without cracking or breaking down
One base holds 2 delineator posts and/or one pedestrian sign
Four mounting holes in base for easy installation to roadways
Three mounting holes for flexible post used in pedestrian sign Four reflective eyelets easily spotted by motorists configuration
Black and yellow safety striping
Four reflective eyelets easily spotted by motorists

Specifications

Molded rubber base with four holes for mounting	
Weight	27 lbs / 12.247 kg
Height	2" / 5.08 cm
Length	36" / 91.44 cm
Width	13 3/4" / 34.925 cm

ADDITIONAL PRODUCTS

- Flexible sign post (FP-80)
- T-Top Delineator Post (T-44)
- FS-1 and FS-3 fasteners for ease of mounting
- Pedestrian signs (LS-25, LY25, SS-25)
