SB-90 Sign Base

SB-90

Signs are necessary for communicating to both pedestrians and drivers about their surroundings. Whether temporary or permanent, molded rubber sign base systems from TCT are a perfect solution for increasing vehicle and pedestrian safety. Sign base systems are ideal for parking lots, crosswalks, guard booths, malls, industrial or construction sites, or anywhere else portable signs might be needed. The sign bases are designed to withstand high winds and extreme weather conditions, making them perfect for outdoor use throughout the year. They will not break down or corrode after being exposed to the elements. Our sign bases are environmentally friendly and made out of recycled tire rubber.

Features

Made of recycled tire rubber
Ideal for outdoor use at construction zones or in areas with high wind speeds
Able to withstand extreme temperatures without cracking or drying out
Can be used in both indoor and outdoor settings
Easy to move and maintain

Specifications

Octagonal base with circular footprint extender base bolted together using three 3/8" x 6" hex-head lag screws	
Weight	90 lbs / 40.8 kg
Height	9" / 22.86 cm
Length	22" / 55.88 cm
Inner circle diameter	1.8" / 4.57 cm
