WCR-9 Wheel Chocks

WCR-9

Wheel chocks are necessary for any construction, industrial or military setting. TCT's wheel chocks are environmentally friendly and made from recycled tire rubber. They can be used for a variety of vehicles, including delivery service fleets, campers, boat trailers, small aircraft, recreational vehicles and even military ground equipment. They are designed so that the downward pressure from the wheels help to lock the chock in place, ensuring that the vehicle will stay in place. TCT's wheel chocks are able to withstand extreme temperatures without cracking or drying out, and are impervious to road salt.

Features

Made from recycled tire rubber
Able to withstand extreme temperatures without cracking or drying out
Designed for downward pressure to help lock wheel chock into place
Eye hooks on each chock can be used to rope two units together, move units with ease, or hang units when not in use

Specifications

Standard smooth, two-sided pyramid wheel chock with eye-hook	
Weight	10 lbs / 4.54 cm
Height	5" / 12.7 cm
Length	10" / 25.4 cm
Width	7 3/4" / 19.68 cm

ADDITIONAL PRODUCTS
