# Parking Stops

WS-2-Y

When designing parking lots, it is important to ensure both pedestrian and driver's safety. Using bumps, humps and parking stops from TCT can increase customer safety while limiting the potential for damage. Speed bumps and humps ensure that drivers decrease their speed in high traffic areas, and are easily transported wherever they may be needed. Parking stops are ideal for preventing damage to buildings, sidewalks and landscaping outside, or they could be used indoors in factories for parking machinery. TCT's speed bumps, humps and parking stops are an effective and durable alternative to concrete curbs. They are designed to withstand extreme temperatures without cracking or drying out.

## Features

Made from durable, molded rubber
Perfect for indoor or outdoor use
Able to withstand extreme temperatures without cracking or drying out
Stops larger vehicles such as buses and trucks
Reflective yellow safety stripes easily identified by motorists
Two holes on top for mounting

## Specifications

Wheel stop with two holes molded through the top for mounting	
End holes 5" from respective ends to center. 12" from hole to hole center to center	
Weight	12.8 lbs / 5.8 kg
Height	6" / 15.24 cm
Length	22" / 55.9 cm
Width	6" / 15.24 cm

## ADDITIONAL PRODUCTS

- Various fastener systems: FS-1, FS-3
- Parking stop with reflective yellow stripes: WS-6-Y
- Parking stop with handicap blue stripes: WS-6-B
