Parking Stops

WS-6-B

When designing parking lots, it is important to ensure both pedestrian's and driver's safety. Using bumps, humps and parking stops from TCT can increase customer safety while limiting potential damage. Speed bumps and humps ensure that drivers decrease their speed in high-traffic areas, and are easily moved around to create the safest parking lot. Parking stops are ideal for preventing damage to buildings, sidewalks and landscaping, or could even be used indoors in factories. TCT's speed bumps, humps and parking stops are an effective and durable alternative to concrete curbs. They are designed to withstand extreme temperatures without cracking or drying out and are ideal for indoor or outdoor use.

Features

| |
|---|
| Made from durable, molded rubber |
| Ideal for indoor or outdoor use |
| Able to withstand extreme conditions without cracking or drying out |
| Blue stripes to differentiate handicap parking locations |
| Environmentally friendly solution to your parking needs |

Specifications

| | |
|---|-------------------|
| Parking stop with four holes molded into the top for mounting | |
| End holes 5" from respective ends to center. 12" from hole to hole center to center | |
| Weight | 31 lbs / 14.06 kg |
| Height | 4" / 10.16 cm |
| Length | 72" / 182.88 cm |
| Width | 6" / 15.24 cm |
| Hole diameter | 1 3/8" / 3.49 cm |

ADDITIONAL PRODUCTS

- Various fastener systems: FS-1, FS-3
- Parking stop with reflective yellow stripes: WS-6-Y
- Bus and Truck stop with reflective yellow stripes: WS-2-Y
