Heavy-Duty 60lb Wheeled Sign Base

SB-60W-HD

Portable sign base systems are ideal for parking lots, crosswalks, guard booths, malls, industrial or construction sites. The sign bases are designed to withstand high winds and extreme weather conditions, making them perfect for outdoor use throughout the year. Our sign bases are environmentally friendly and made out of recycled tire rubber.

Features

Made of recycled tire rubber
Ideal for use in construction zones, parking lots or areas with heavy traffic
Able to withstand extreme temperatures without cracking or drying out
Can be used either in indoor or outdoor settings
Durable 5" diameter wheel with 1/2" steel axle
16" wheel separation for added stability and ease of movement
Base size of 21"x21"x5" in a modified circle provides for increased sign stability
